

FENIX
LIGHTING FOR EXTREMES

HT32

OUTDOOR HUNTING FLASHLIGHT

	2500 LUMENS MAXIMUM OUTPUT
	640 METERS MAX BEAM DISTANCE

*21700 Li-ion batteries are powerful cells designed for commercial applications and must be treated with caution and handled with care. Only using quality batteries with circuit protection will reduce the potential for combustion or explosion; cell damage or short circuiting are considered user induced damage and are not covered by any Fenix warranty or liability.

The light will accumulate a lot of heat when used at high output levels for extended periods. When the light reaches a temperature of 65°C/149°F or above, the light will automatically step down a few lumens to reduce the temperature. When the temperature drops below 65°C/149°F, it will then gradually return to the standard output level.

When the voltage level drops below the preset level, the flashlight is programmed to downshift to a lower brightness level until Low output is reached. When this brightness level is reached (Low output), the light
